## **DETAILED ACTION**

1. Applicant's election of Figures 1-3 in Paper No. 6 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
  - (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
  - (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Gutierrez.

The patent to Gutierrez discloses a collision avoidance system for a vehicle that uses GPS locations and notifies other crafts of their location by a UHF tower as shown in Fig. 3 and described in column 6. Column 9, lines 1-20, describe the alarm warning system.ENDFIELD
